Profile

I'm a UK-based Front-End Developer and recent Computer Science graduate from the University of Bedfordshire. I am passionate about creating user-friendly websites and turning creative ideas into reality. I am currently seeking a challenging position where I can apply my skills in front-end development and contribute to creating innovative and user-centric web solutions.

Technical Skills

HTML
CSS
SASS
TailWind
JavaScript
React
Git
GitHub

Soft Skills

Problem Solving
Attention to Detail
Communication Skills
Adaptability
Teamwork and Collaboration
Continuous Learning

Education

Computer Science BSc (Hons)   Sep 2018 - Jul 2021
University of Bedfordshire, Luton

Awarded First-Class Honours for outstanding academic performance and have actively participated in collaborative projects and team-based assignments, gaining hands-on experience in real-world problem-solving.

Projects

TODO APP

Developed a user-friendly task management app as a solo project, utilizing React for dynamic task management and a modern, intuitive user interface. Designed styles with SASS. Implemented version control using GIT and hosted the project on GitHub.

🌐 Live   🖥 Code

URL Shortener (Shortly)

Developed a URL Shortening API as a solo project, utilizing React for user interface components and SASS for styling. Implemented JavaScript to interact with the URL shortening API, enabling efficient link management and creating compact, user-friendly links for easy sharing.

🌐 Live   🖥 Code

Blogr

Blogr Landing Page designed with a user-friendly interface using HTML, CSS, and JavaScript. A modern hub for effortless and stylish content creation, introducing responsive design principles for optimal user experience.

🌐 Live   🖥 Code

Nailz

Solo project creating a captivating e-commerce site for nail products and online/offline nail art courses. Leveraged React for dynamic front-end features and SASS for styling, showcasing proficiency in modern web development.

🌐 Live   🖥 Code

AniNet

Created AniNet, an online platform for anime enthusiasts, utilizing React for dynamic front-end features and Tailwind for styling. Developed with a focus on facilitating exploration, discovery, and in-depth exploration of anime titles
